

Mental Health & Suicide Prevention Advisory Committee

Background

Primary Health Networks (PHNs) have been established with the key objectives of increasing the efficiency and effectiveness of primary health care services for individuals of each region, particularly people at risk of poor health outcomes.

CESPHN is committed to building a person centred, integrated system of mental health care in the central and eastern Sydney region, ensuring people with a mental health need can access timely and wellness-focused care that optimises recovery and supports self-management and enhanced mental health.

PHNs are funded to ensure a regional approach to mental health and suicide prevention by developing evidence-based plans and service mapping that identifies needs and gaps, increases efficiencies, and encourages the integration of mental health services and supports.
