

**PLEASE READ- IMPORTANT INFORMATION ABOUT YOUR  
INFLUENZA VACCINE ORDER**

**Temporary replacement of Vaxigrip Tetra vaccine with FluQuadri vaccine for children 6 months to under 5 years**

The National Immunisation Program has experienced a short delay in the supply of Vaxigrip Tetra vaccine.

- FluQuadri vaccine will be supplied as an alternative influenza vaccine for children aged 6 months to under 5 years at the beginning of the 2025 Influenza Vaccination Program until the supply of Vaxigrip Tetra becomes available.
- FluQuadri vaccine is approved by the Therapeutic Goods Administration for use in this age group and has been used in Australia for several years. It has a well-established safety profile.
- Due to the late addition of the FluQuadri vaccine, its packaging will not be labelled “Government Funded Program – 2025” as with other NIP influenza vaccines.
- Immunisation providers must make sure the FluQuadri stock is only used and recorded on the Australian Immunisation Register as a **NIP-funded vaccine for children 6 months to under 5 years**.
- Please ensure all staff are aware of this temporary supply issue to ensure appropriate stock management.
- Continue to encourage influenza vaccination among children aged 6 months to under 5 years to ensure protection ahead of the flu season.

Should you have any questions or require further information, please contact your local Public Health Unit **1300 066 055**.

Regards
