Value for Organisations

Develop the technique to safely collect blood from patients and learn the importance of correctly collecting patient data relevant for clinical documentation. Understand blood collection and how to choose the appropriate equipment with practical demonstration, and discussions around managing possible complications.

Learning Outcomes

- Choose appropriate equipment for blood collection
- Discuss the factors that influence the correct selection of blood collection equipment
- Discuss and manage possible complications
- Identify and obtain clinical and relevant personal data for blood collection
- Perform blood collections
- Perform post-blood collection procedures including client care, documentation and follow up.
