

You can **help eliminate hepatitis C**.  
Let's do it together with

# Beyond the C

**Hepatitis C is curable and can be managed in primary care.**

Beyond the C is a **national partnership program** providing general practices with support to find people who may be living with hepatitis C and engage them with care.

## Benefits for your practice

Your practice will learn transferable case-finding skills, plus:

- ✓ **Incentive payment of \$4,000** upon project completion.
- ✓ **5 Measuring Outcomes hours** under the RACGP CPD Program and ACRRM PD Program.
- ✓ **Personalised support** through our Practice Nurse Advisor and ongoing access to a suite of resources.
- ✓ **Increase MBS billing potential** and access PIP QI funds.

**With hepatitis C often being asymptomatic, case-finding is essential to connect people with the care they need.<sup>1</sup>**

By joining Beyond the C, your practice will be making a difference in people's long-term health outcomes and contribute towards Australia's goal of **eliminating hepatitis C** nationally by 2030.
