

QI TEMPLATE

QIM 4: Influenza vaccination in patients aged 65+ years

PIP QI quarter: <i>please tick</i> ✓	Quarter 1	Quarter 2	Quarter 3	Quarter 4
Date:	Nov – Jan <input type="checkbox"/>	Feb – Apr <input type="checkbox"/>	May – Jul <input type="checkbox"/>	Aug – Oct <input type="checkbox"/>
QI Activity: QIM 4	Influenza vaccination in patients aged 65+ years – Recall			
Activity goal: <i>What to improve and timeframe</i>	Increase proportion of patients aged 65+ years who have been immunised for influenza (in the previous 15 months) from 1 April to 31 July.			
Activity measures: <i>What data is used to monitor progress</i>	Use POLAR to measure the percentage of patients aged 65+ years have received a flu vaccine in the previous 15 months.			
Initial benchmark: <i>Baseline data prior to QI activity</i>	1 April 2026: % patients 65+ years immunised for influenza			
Activity overview: <i>Action plan to drive improvement</i>	<ol style="list-style-type: none"> 1. Generate a list of patients 65+ years who have not received a flu vaccine in the previous 15 months using POLAR 2. Send a recall or reminder and flag patient for immunisation at next visit 3. Order and display influenza resources in waiting room 4. Arrange and promote flu vaccine clinics 			
Monthly progress <i>Monitor progress at the end of each month</i>	30 April: % patients 65+ years immunised for influenza 31 May: % patients 65+ years immunised for influenza 30 June: % patients 65+ years immunised for influenza 31 July: % patients 65+ years immunised for influenza			
Reflection: <i>Reflect on achievements, challenges and lessons</i>
