QI TEMPLATE

QIM 5: Influenza vaccination in patients with diabetes

PIP QI quarter: *please tick* ✔	Quarter 1	Quarter 2	Quarter 3	Quarter 4
Date:	*Nov – Jan* ☐	*Feb – Apr* ☐	*May – Jul* ☐	*Aug – Oct* ☐
QI Activity: QIM 5	Influenza vaccination in patients with diabetes – Recall			
Activity goal: *What to improve and timeframe*	Increase proportion of patients with diabetes who have been immunised for influenza (in the previous 15 months) from 1 April to 31 July.			
Activity measures: *What data is used to monitor progress*	Use POLAR to measure the percentage of patients with diabetes who have received a flu vaccine in the previous 15 months.			
Initial benchmark: *Baseline data prior to QI activity*	1 April 2026: % patients with diabetes immunised for influenza			
Activity overview: *Action plan to drive improvement*	1. Generate a list of diabetic patients who have not received a flu vaccine in the previous 15 months using POLAR 2. Send a recall or reminder and flag patient for immunisation at next visit 3. Order and display influenza resources in waiting room 4. Arrange and promote flu vaccine clinics			
Monthly progress *Monitor progress at the end of each month*	30 April: % patients with diabetes immunised for influenza 31 May: % patients with diabetes immunised for influenza 30 June: % patients with diabetes immunised for influenza 31 July: % patients with diabetes immunised for influenza			
Reflection: *Reflect on achievements, challenges and lessons*
