

Activity 2.1 – Data collection from clinical software

To search for the number of active patients with dementia and a completed advance health directive:

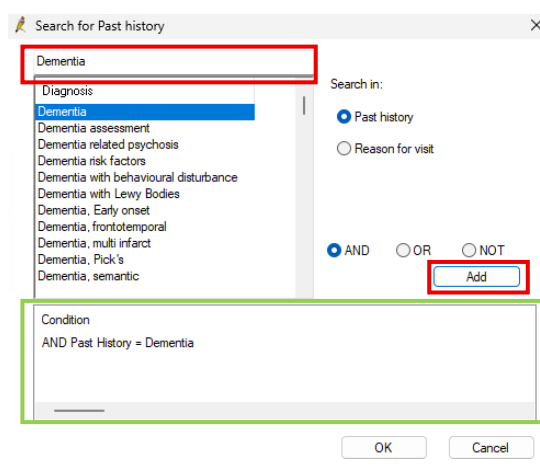

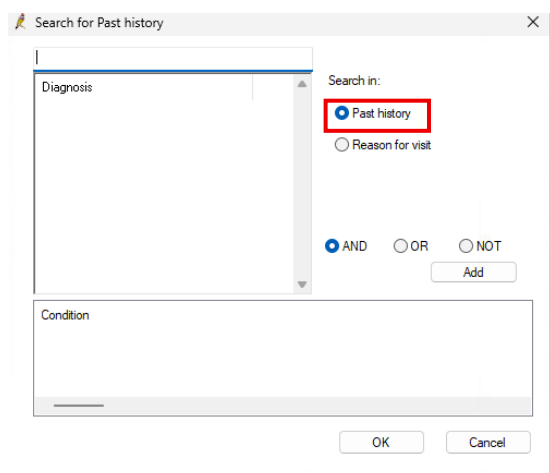

1. Select ‘Utilities’ in the top bar, then select ‘Search’.

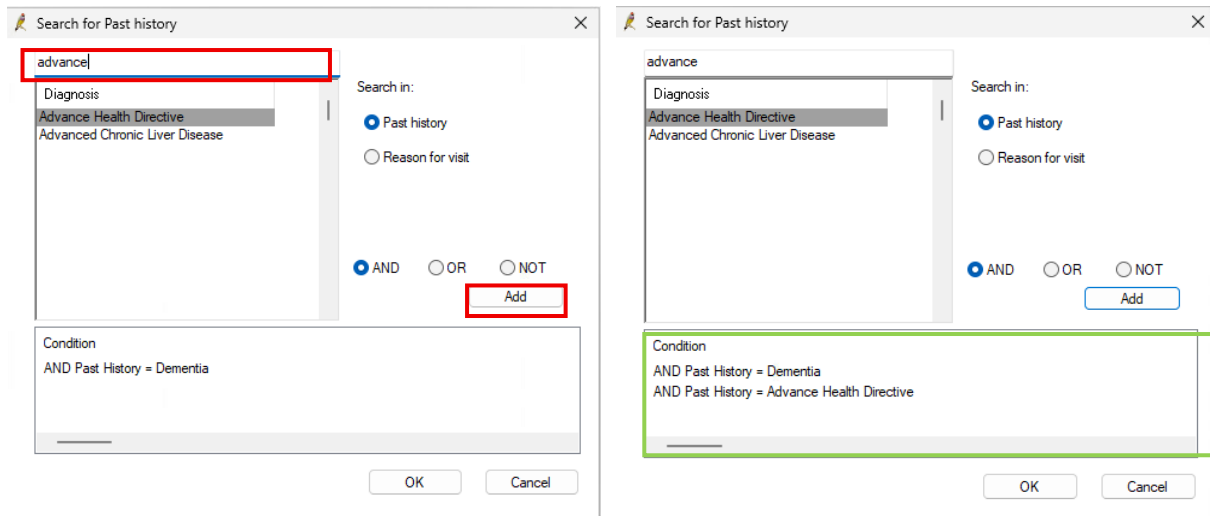

2. On the menu that appears, select ‘Conditions’

3. In the box that appears, select ‘Past History’, then type ‘Dementia’ in the diagnosis box. Then select ‘Add’. Dementia should be added in the condition box (highlighted in green).

4. In the Diagnosis box type in 'Advance Health Directive'. Click 'Add'. Advance Health Directive should now appear in the Condition box (highlighted in green).

5. Select 'Ok'
6. Select 'Run Query' and your list of dementia patients with an Advance Health Directive will appear.
