

Connecting GPs with Concord Hospital's Upper GI Surgical Unit and Specialised Cancer Centre

Connecting GPs with patient care management and referral processes to our public services at Concord Hospital.

Join some of our specialists from the Upper Gastro Intestinal Surgery Unit at Concord Hospital.

The evening's emphasis will be on Upper GI cancers, specifically addressing the services and support we provide for patients affected by esophageal, gastric, liver and pancreatic cancers. We will also be highlighting the referral pathways through the Concord Hospital system for your patients.

Light refreshments will be offered during the evening. We welcome all to come and meet our Concord Hospital Upper GI surgeons in person!
